

SQUARE READER FOR CONTACTLESS AND CHIP

# A simple way to accept chip cards and contactless payments

\$49

[Buy now](#)

# Secure. Fast. Simple.

Square's contactless and chip reader enables you to accept chip cards, contactless (NFC) cards, Apple Pay, and Google Pay anywhere. Connect wirelessly, accept credit and debit cards quickly, and get money in your bank account fast.

# Just dip or tap to pay.

Be ready for every sale with Square Reader for contactless and chip. More customers than ever are paying with contactless (NFC) cards, and over 95% of cards processed through Square are EMV chip cards. Every dip or tap payment is the same simple rate: 2.6% + 10 cents.

## Dip the chip

Chip cards (or EMV) are the new standard in payment cards. Chip cards are inserted into the reader, then left in place for the duration of the sale.

## Tap to pay

Customers don't have to hand over cash. They simply hold their devices or contactless cards near the NFC reader to trigger a fast, contactless payment like

duration of the sale.
